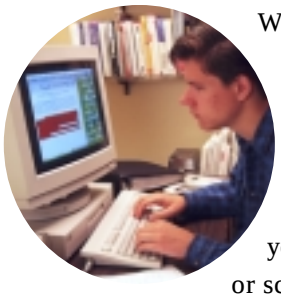
OKIPAGE® 6w

DIGITAL LED PRINTER

Great Output from the Most Affordable Printing Solution.

The OKIPAGE® 6w is a small marvel: it's lightweight (under 10 lb.), takes up about the same desk space as a sheet of paper — and turns out clear, sharp documents at 6 pages a minute.



While its performance is big, the price of the OKIPAGE 6w is wonderfully small, which makes it the perfect solution for your business, home or school printing needs.

This printer is designed specifically for use with Windows® applications. It's compatible with the most popular Windows® 98, 95, 3.1x and NT® 4.0 programs (not recommended for use as a shared device in networked environments), plus MS-DOS® through its Windows-DOS prompt.

For plug-and-play productivity, just connect the OKIPAGE 6w to your computer with a bi-directional cable and install the printer software. You can then control printing directly from your PC through familiar point-and-click operations. It operates almost silently and is environmentally friendly, too, featuring Energy Star® compliance.

What the OKIPAGE 6w delivers is crisp 600 dpi class Digital LED output. Razor-sharp documents that — unlike inkjet — are smear-free and produced at an extremely low cost per page: only pennies apiece!

The OKIPAGE 6w features a top-loading, 100-sheet external autofeeder, which makes it easy to change paper sizes and types. It also has manual feed capabilities, with a straight paper path for printing on heavier paper stock and other non-standard media such as labels, card stock, even transparencies.

With the unlimited font capability you get from Windows applications, your documents look great. And the OKIPAGE 6w sports a number of its own special features: customizable watermarks, 2- and 4-up "thumbnail" layouts, and toner-saving print modes.

Compact. Fast. Versatile. Affordable. That's the OKIPAGE 6w from OKI. Simply, your best printer value.

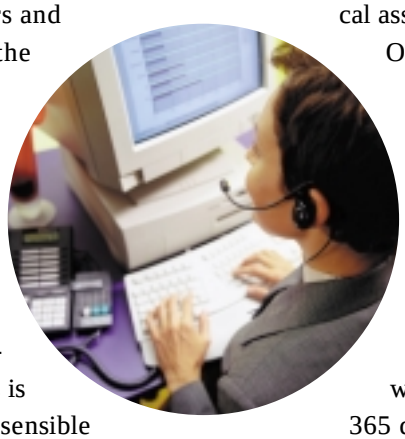
The best value for professional-looking documents for office, home or school.

OKI®
People to People Technology™

Technology-driven reliability. Industry-leading support.

Driving the performance of the OKIPAGE® 6w is OKI Digital LED Technology.

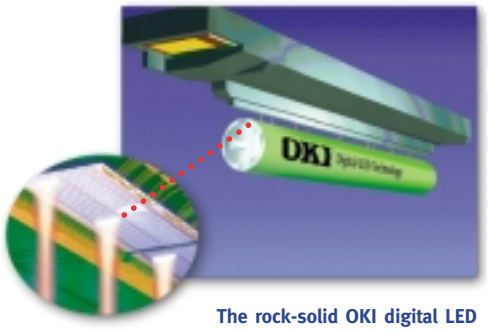
Unlike lasers, which print through a complicated series of rotating mirrors and moving parts, the OKI printing process uses flashing pin-point beams of light that go straight to the image drum. All rock-solid state, this is simply a more sensible technology — or, as we like to put it: Digital LED Printing. Simply Smarter Than Laser.™



And because it's so reliable, you'll be able to count on your investment for years to come. OKI backs it with a 1-year limited warranty on parts and labor with Overnight Exchange*, and the only 5-year printhead warranty in the business.

Should you ever need technical assistance, count on OKIcare™ service and support. Simply call our customer support hotline:* 1-800-OKI-DATA (800-654-3282) and speak to a live service representative, 7 days a week, 24 hours a day, 365 days a year.

For more information on the OKIPAGE 6w or other OKI® printers, visit our web site at www.okidata.com. Or, for the OKI dealer nearest you, call 1-800-OKI-DATA.



The rock-solid OKI digital LED printhead utilizes a stationary array of pulsing light-emitting diodes (detail) to create high-resolution text and graphics.
